

I want to comment in strong support of expanding LPFM. Before our new LPFM station KYRS-LP come on the air there was virtually no forum for community based broadcasting that was produced locally in Spokane. Now we have terrific shows that cover environmental and social issues that never get coverage on other radio stations in town--including public radio. Our radio in Spokane is dominated by non-local corporate broadcasting that has no regard for the character of our community. I urge you to aggressively expand LPFM so that more communities around the country can experience media democracy in action!
